## 1. Introduction

Our goal is to obtain, as closely as possible, the same appearance for all abstracts included in the proceedings of the AMAM 2003. These instructions have been prepared in the preferred format and therefore, you should prepare your abstract as closely as possible to this example. If necessary, use an MS Word submissions. The total length of the abstract should not exceed 1 page.

## 2. Manuscript Preparation

Text and illustrations should fill, but not extend beyond an area of 157 x 227 mm. Therefore, authors should adhere closely to the dimensions of Table 1 and apply them to a document that will print onto A4 (210 x 297 mm) paper. Just copying this template will do the job.

Table 1: Dimensions for creating correct printing area.

| | |
|---|---:|
| Top margin | 38 mm |
| Bottom margin | 32 mm |
| Left margin | 30 mm |
| Right margin | 23 mm |
| Column width | 76.5 mm |
| Column length | 227 mm |
| Gutter between columns | 4 mm |

## 3. Title and Headings

The title of your paper, the authors' names, and the affiliations should appear as in this example. Keep the size and font commands throughout.

The first paragraph following any sort of heading should not be indented, but all subsequent paragraphs need to be indented. Do not end a page with a heading unless there is room for at least two lines of text as well. For the top-level headings, please use capital letters for the first letter of each significant word.

### 3.1. Subheadings and capitalization

With subheadings, only the first letter of the first word should be a capital letter.

#### 3.1.1. Subsubheadings and capitalization

With subsubheadings also, only the first letter of the first word should be a capital letter.

## 4. Page Numbers

Do not generate page numbers. The settings in this example automatically suppress page numbers.

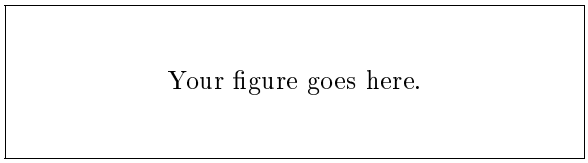

Figure 1: Figure caption is with a small font.

## 5. Figures and Tables

Captions for figures and tables should be 9pt; this template automatically does this. It is essential that all figures and tables fit into the required area of 157 x 227 mm. Only black and white photos and figures are accepted; ensure that they print clearly. Try to avoid shading in figures and tables, because that does not reproduce well.

## 6. Text Citations and Reference List

Number references consecutively in the order in which they are first mentioned in the text by Arabic numerals in square brackets. For example, "...previously published [1]."
